

AHCCCS Data (by Congressional District) to Inform Potential Federal Medicaid Changes

Prepared for:

Arizona Health Care Cost Containment System

Written by:

Stephen Pawlowski

May 2025

Introduction

The House of Representatives' budget resolution for fiscal year 2025 (House Concurrent Resolution 14) adopted on February 25, 2025 calls on the Committee on Energy and Commerce to reduce spending on programs within its jurisdiction by \$880 billion over the next ten years. Many of the options being considered by the Committee relate to the Medicaid program.

In Arizona, the Medicaid program is administered by the Arizona Health Care Cost Containment System (AHCCCS). AHCCCS continues to monitor federal proposals related to Medicaid and is committed to providing information to policymakers and stakeholders regarding the potential impacts on Arizona.

AHCCCS has contracted with Health Management Associates (HMA) to support the agency's analytic efforts. Founded in 1985, HMA is a leading independent, national research and consulting firm that provides technical assistance and training, facilitation and strategic planning, research and evaluation, policy development and recommendations, technical report writing, and analytical services with a focus on improving the administration and delivery of public health and human services programs.

This report provides data related to AHCCCS enrollment and payments to providers. In terms of enrollment, this report covers individuals receiving comprehensive Medicaid benefits through AHCCCS, grouped into the following categories:

- **Traditional Medicaid** covers select categories of children and adults, including SSI Cash, SSI Related, 1931 AHCCCS for Families and Children, SOBRA Child, SOBRA Pregnant, Transitional Medical Assistance, Freedom to Work, and Breast and Cervical Cancer Program. This group includes some individuals covered through Proposition 204, but excludes anyone eligible for the enhanced 90 percent federal medical assistance percentage (FMAP) for Medicaid expansion groups.
- **Expansion-Prop 204** includes the portion of the Proposition 204 population for whom AHCCCS receives a 90 percent FMAP. The voter-approved Prop 204 provides coverage to adults without dependent children ("childless adults") with incomes up to 100 percent of the federal poverty level (FPL).
- **Expansion-ACA** includes childless adults with incomes between 100 and 133 percent of the FPL. The Legislature approved this expansion group after passage of the federal Affordable Care Act (ACA). This group is also referred to as the "newly eligible" population.
- **Arizona Long Term Care System (ALTCs)** includes individuals who have an age-related disability, physical disability, or intellectual or developmental disability, and who require institutional level care.

This report includes the following data:

- Table 1 reports enrollment by major eligibility group by congressional district
- Table 2 reports enrollment by age group by congressional district; there are additional tables (Tables 2A through 2D) for each major eligibility group by age group and gender
- Table 3 compares Medicaid enrollment to employer-based insurance by congressional district
- Table 4 provides information related to diagnoses of AHCCCS enrollees
- Table 5 reports payments by provider group by congressional district

AHCCCS and HMA previously produced a similar report with county-based data (payment totals differ slightly due to the timing of data extracts). Additional data will be shared and posted to <https://www.azahcccs.gov/AHCCCS/AboutUs/ahcccsinsights.html> as analyses are completed.

Table 1: Medicaid Population by Eligibility Group, as of January 1, 2025^{1,2}

Statewide	1,213,724	433,300	66,851	72,324	1,786,199

¹ Includes individuals receiving comprehensive Medicaid benefits; individuals enrolled in KidsCare, those receiving only Medicare cost-sharing, and similar groups are excluded. Total AHCCCS enrollment in January 2025 was 2,048,972 (see <https://www.azahcccs.gov/Resources/Reports/population.html>).

² Individuals with a zip code but not a complete address on record were proportionally assigned to a congressional district based on the proportion of the zip code's land area in each district. As a result, figures may not sum due to rounding.

³ Includes both individuals enrolled in the developmental disabilities (DD) program and in the elderly and physically disabled (EPD) program.

Table Highlights

As of January 1, 2025, about 1.8 million Arizonans received comprehensive Medicaid benefits through AHCCCS, including:

- More than 1.2 million individuals in the “traditional” Medicaid population.
- 500,000 individuals in the “expansion group” (most of whom have coverage through Proposition 204 approved by voters in 2000 and a smaller group that gained coverage through the legislated expansion adopted after passage of the federal Affordable Care Act).
- More than 72,000 individuals who are elderly, have significant physical disabilities, or have intellectual and developmental disabilities, and who are enrolled in the Arizona Long Term Care System (ALTCS).

¹ Includes individuals receiving comprehensive Medicaid benefits; individuals enrolled in KidsCare, those receiving only Medicare cost-sharing, and similar groups are excluded. Total AHCCCS enrollment in January 2025 was 2,048,972 (see <https://www.azahcccs.gov/Resources/Reports/population.html>).

² Individuals with a zip code but not a complete address on record were proportionally assigned to a congressional district based on the proportion of the zip code’s land area in each district. As a result, figures may not sum due to rounding.

Table Highlights

- More than 40 percent of Arizonans enrolled in AHCCCS are children.
- Combined, children and individuals over the age of 65 account for nearly half of AHCCCS’ enrollment.

- ¹ Individuals with a zip code but not a complete address on record were proportionally assigned to a congressional district based on the proportion of the zip code’s land area in each district. As a result, figures may not sum due to rounding.
- ² Gender information was not recorded for 52 individuals. As a result, the sum of the values in the female and male tables will not equal the total reported in the combined table.
- ³ Counts exclude 39 individuals who are not within the listed age groups, primarily individuals who turned 65 years of age during the month.

¹ One-year estimate from the American Community Survey (Table K200101). The Arizona Office of Economic Opportunity estimates a statewide population of 7,621,703 as of July 1, 2024 (https://oeo.az.gov/sites/default/files/data/popest/2024_Estimates/July1_2024_Arizona_Population_Estimates.pdf).

² Includes individuals receiving comprehensive Medicaid benefits; individuals enrolled in KidsCare, those receiving only Medicare cost-sharing, and similar groups are excluded. Total AHCCCS enrollment in January 2025 was 2,048,972 (see <https://www.azahcccs.gov/Resources/Reports/population.html>).

³ Five-year estimates (2019-2023) from the American Community Survey (Table S2703).

Table Highlights

- More than 35 percent of residents in Congressional Districts 3 (southeastern part of the Phoenix metropolitan area) and 7 (southern Arizona) rely on Medicaid coverage.
- Employer-based insurance is much less prevalent in rural Arizona; fewer than half of residents have employer-based insurance in Congressional Districts 2 (northern and eastern Arizona), 6 (southeastern Arizona), 7 (southern Arizona), and 9 (western Arizona), as well as Congressional District 3 (southeastern part of the Phoenix metropolitan area).

Table 4: Care Received for Select Medical Conditions¹ by Eligibility Group, Federal Fiscal Year 2024

<i>Care Related to an Organ or Tissue Transplant (includes transplants as well as aftercare)</i>	3,151	1,266	230	566	5,050
<i>Care Related to Pregnancy and Childbirth</i>	56,968	10,545	3,522	86	65,832
<i>Care Related to Congenital Malformations, Deformations and Chromosomal Abnormalities</i>	56,331	8,299	1,400	12,466	77,726

¹ Counts of individuals with one or more paid services that listed one or more diagnoses within diagnosis group during federal fiscal year 2024.

² Sum of counts by eligibility group exceed overall total because individuals who changed eligibility group during the year are counted in each group.

³ Included in parent diagnosis group.

Table Highlights

- More than one-third of Medicaid enrollees have a mental, behavioral, or neurodevelopmental disorder; more than one-third have an endocrine, nutritional, or metabolic disorder; and more the one-third have a disease of the respiratory system (individuals may have conditions in multiple diagnosis groups).
- Compared to the traditional Medicaid population, individuals in the expansion populations are more likely to receive a variety of care; for example (without adjusting for enrollee age):
 - They are 66 percent more likely to have received care associated with a mental, behavioral, or neurodevelopmental disorder.
 - 51 percent more likely to have received care for an endocrine, nutritional, or metabolic disorder.
 - 78 percent more likely to have received care for a circulatory disorder.

- ¹ Figures include payments made for services (both by managed care organizations and by AHCCCS through fee-for-service) and as well as supplemental payments to hospitals. These figures are intended to capture the value of payments to service providers, but do not include AHCCCS’ administrative costs, managed care organizations’ administrative costs, manual payments and adjustments, and similar expenses. As a result, these totals will not be equal to AHCCCS’ certified actuarial rates or official financial reporting.
- ² Spending has been assigned based on AHCCCS provider types, which have been grouped together into the categories displayed (the provider types assigned to each grouping are reported in Table 5A).
- ³ Congressional district has been assigned based on the district in which the individual receiving the service resides.

Table Highlights

- In federal fiscal year 2024, providers received \$18.6 billion in payments for services provided through AHCCCS.

- ¹ Figures include payments made for services (both by managed care organizations and by AHCCCS through fee-for-service) and as well as supplemental payments to hospitals. These figures are intended to capture the value of payments to service providers, but do not include AHCCCS’ administrative costs, managed care organizations’ administrative costs, manual payments and adjustments, and similar expenses. As a result, these totals will not be equal to AHCCCS’ certified actuarial rates or official financial reporting.
- ² Spending has been assigned based on AHCCCS provider types, which have been grouped together into the categories displayed (the provider types assigned to each grouping are reported in Table 5A).
- ³ Congressional district has been assigned based on the district in which the individual receiving the service resides.
