

MEASURE RATES - HEALTHII

ARIZONA HEALTH CARE COST CONTAINMENT SYSTEM (AHCCCS)

DELIVERABLE 7.3.3. / DELIVERABLE 7.5.3.

02/24/25

Revision History

Initiated By / Date	Approved By / Date	Comments
Donia Watson 01/13/25		Draft document.
Donia Watson 01/14/25		Replaced PSI 11 table. Removed AHCCCS ID 111111 and 222222 rows from AHCCCS-10 table. Updated Hospital Name for AHCCCS ID 083727 in AHCCCS-10 table.
Donia Watson 02/17/25	Rod Freeman 02/24/25	Revised with Self-Reported Review Period resubmissions. Extended row height on AHCCCS-01, AHCCCS-10, and Calculated Measures MCO/FFS rate tables.

Contents	3
Aggregate Rates	4
AHCCCS-01 (CBE 0431 Modified): Influenza Vaccination Coverage Among Healthcare Personnel.....	9
AHCCCS-02 (CBE 0531 Modified): Patient Safety Indicator (PSI) 90: Patient Safety and Adverse Events Composite.....	11
AHCCCS-03 (CBE 0640 Modified): HBIPS-2 Hours of Physical Restraint Use	35
AHCCCS-04 (CBE 0641 Modified): HBIPS-3 Hours of Seclusion Use	37
AHCCCS-05 (CBE 0674 Modified): Percent of Residents Experiencing One or More Falls with Major Injury	39
AHCCCS-06 (CBE 1717 Modified): National Healthcare Safety Network (NHSN) Facility-wide Inpatient Hospital-onset Clostridium difficile Infection (CDI) Outcome Measure	41
AHCCCS-07 (CBE 1789 Modified): 30-Day Hospital-Wide All-Cause Unplanned Readmission Rate	43
AHCCCS-08 (CBE 2393 Modified): Pediatric All-Condition Readmission Measure	45
AHCCCS-09 (CBE 2631 Modified): Percent of Long-Term Care Hospital (LTCH) Patients with an Admission and Discharge Functional Assessment and a Care Plan That Addresses Function ..	47
AHCCCS-10 (CBE 3479 Modified): Discharge to Community-Post Acute Care Measure for Inpatient Rehabilitation Facilities (IRF)	49
AHCCCS-11: Successful Implementation of Antibiotic Stewardship Program	51
AHCCCS-12 (OP-18 Modified): Median Time from ED Arrival to ED Departure for Discharged ED Patients.....	53
Measure Rates Data	55
Appendix A. MCO/FFS Rates for Calculated Measures	56
Appendix B. Target Performance Recommendations.....	60
Appendix C. Year 4 Narrative Responses	63

Aggregate Rates

Hospital Self-Reported Aggregate Rates

Aggregate measure rates for all hospital self-reported measures are provided on the next page.

	Year 4		
	Denominator	Numerator	Rate*
	10/01/2023 - 03/31/2024		
AHCCCS-01: Influenza Vaccination Coverage Among Healthcare Personnel**	206,874.00	190,998.00	92.33%
Critical Access Hospitals	4,563.00	4,147.00	90.88%
Free Standing Children's Hospitals	8,708.00	8,536.00	98.02%
Freestanding Rehabilitation Hospitals	5,211.00	4,600.00	88.27%
General Acute	176,453.00	163,208.00	92.49%
Long Term Acute Care Hospitals	1,010.00	918.00	90.89%
Psychiatric Hospitals	7,880.00	7,107.00	90.19%
Short Stay Hospitals	3,049.00	2,482.00	81.40%
10/01/2022 - 09/30/2023			
AHCCCS-03: HBIPS-2 Hours of Physical Restraint Use	297,987.00	451.89	0.06
Psychiatric Hospitals	297,987.00	451.89	0.06
10/01/2022 - 09/30/2023			
AHCCCS-04: HBIPS-3 Hours of Seclusion Use	215,319.00	1,173.57	0.23
Psychiatric Hospitals	215,319.00	1,173.57	0.23
10/01/2022 - 09/30/2023			
AHCCCS-05: Percent of Residents Experiencing One or More Falls with Major Injury	674.00	0.00	0.00%
Freestanding Rehabilitation Hospitals	498.00	0.00	0.00%
Long Term Acute Care Hospitals	176.00	0.00	0.00%
10/01/2022 - 09/30/2023			
AHCCCS-06: National Healthcare Safety Network (NHSN) Facility-wide Inpatient Hospital-onset Clostridium difficile Infection (CDI) Outcome Measure	178,439.00	345.00	0.19%
Free Standing Children's Hospitals	9,055.00	18.00	0.20%
General Acute	169,384.00	327.00	0.19%
10/01/2022 - 09/30/2023			
AHCCCS-09: Percent of Long-Term Care Hospital (LTCH) Patients with an Admission and Discharge Functional Assessment and a Care Plan That Addresses Function	183.00	181.00	98.91%
Long Term Acute Care Hospitals	183.00	181.00	98.91%
10/01/2022 - 09/30/2023			
AHCCCS-11: Successful Implementation of Antibiotic Stewardship Program	84.00	80.00	95.24%
Critical Access Hospitals	84.00	80.00	95.24%
10/01/2022 - 09/30/2023			
Average Median Time (Minutes)			
AHCCCS-12: Median Time from ED Arrival to ED Departure for Discharged ED Patients	124.25		
Critical Access Hospitals	124.25		

* The overall measure rate was calculated by using true numerator and denominator values. Note that only providers with positive denominators are used to calculate the overall rate.

** AHCCCS-01 Aggregate calculated using Vaccinated at Institution + Elsewhere, Medical Contraindication, and Declined Vaccination numerator values.

Calculated Aggregate Rates

Aggregate measure rates for all measures calculated via AHCCCS Claims data are provided on the next page.

	Year 4		
	10/01/2022 - 09/30/2023		
	Denominator	Numerator	Rate*
AHCCCS-02: Patient Safety Indicator (PSI) 90: Patient Safety and Adverse Events Composite	256,263.00	269.00	0.001050
General Acute	256,263.00	269.00	0.001050
AHCCCS-07: Hospital-Wide All-Cause Unplanned Readmission Measure (HWR)	91.00	0.00	0.00%
Short Stay Hospitals	91.00	0.00	0.00%
AHCCCS-08: Pediatric All-Condition Readmission Measure	7,567.00	138.00	1.82%
Freestanding Children's Hospitals	7,567.00	138.00	1.82%
AHCCCS-10: Discharge to Community-Post Acute Care Measure for Inpatient Rehabilitation Facilities (IRF)	873.00	708.00	81.10%
Freestanding Rehabilitation Hospitals	873.00	708.00	81.10%
* The overall measure rate was calculated by using true numerator and denominator values. Note that only providers with positive denominators are used to calculate the overall rate.			

The following sections provide hospital-level detail for each HEALTHII measure.

NOTE:

- Self-Reported Measures
 - “No Data” indicates a No Data submission was completed
 - “0” indicates data was not submitted
 - No Data submissions are excluded from calculations
- Calculated Measures
 - “No Claims Data Received” indicates no Claims data was received from a facility
 - “0” indicates Claims data was received, but none applicable to the measure
 - No Claims Data Received submissions are excluded from calculations

AHCCCS-01 (CBE 0431 Modified): Influenza Vaccination Coverage Among Healthcare Personnel

The remainder of this page is intentionally left blank.

AHCCCS-01 (CBE 0431 Modified): Influenza Vaccination Coverage Among Healthcare Personnel

* No. of Psychiatric Inpatient Days = Hospital Stay Duration - Total Leave Days. The measure rate calculation considers the Denominator per 1,000 hours and is calculated as **Rate = (Numerator * 1000) / (Denominator * 24)**.

** The values included in the Rate column represent the Rate per 1,000 patient hours and is calculated as **Rate = (Numerator * 1000) / (Denominator * 24)**. When multiplied by 1,000, the rate measures Numerator occurrence per total patient days.

Appendix A. MCO/FFS Rates for Calculated Measures

Appendix A provides Managed Care (MCO) and/or Fee For Service (FFS) rates per the calculated measure definitions, as applicable.

MCO Rates

The remainder of this page is intentionally left blank.

MCO Rates	Year 4		
	10/01/2022 - 09/30/2023		
	Denominator	Numerator	Rate*
AHCCCS-02: Patient Safety Indicator (PSI) 90: Patient Safety and Adverse Events Composite	218,699.00	233.00	0.001065
AHCCCS-07: Hospital-Wide All-Cause Unplanned Readmission Measure (HWR)	87.00	0.00	0.00%
AHCCCS-08: Pediatric All-Condition Readmission Measure	6,942.00	126.00	1.82%
AHCCCS-10: Discharge to Community-Post Acute Care Measure for Inpatient Rehabilitation Facilities (IRF)	746.00	603.00	80.83%

* The overall measure rate was calculated by using true numerator and denominator values. Note that only providers with positive denominators are used to calculate the overall rate.

FFS Rates

The remainder of this page is intentionally left blank.

FFS Rates	Year 4		
	10/01/2022 - 09/30/2023		
	Denominator	Numerator	Rate*
AHCCCS-08: Pediatric All-Condition Readmission Measure	625.00	12.00	1.92%
AHCCCS-10: Discharge to Community-Post Acute Care Measure for Inpatient Rehabilitation Facilities (IRF)	127.00	105.00	82.68%

* The overall measure rate was calculated by using true numerator and denominator values. Note that only providers with positive denominators are used to calculate the overall rate.

Appendix B. Target Performance Recommendations

The following sections provide HealthTech recommendations for Performance targets for HEALTHII measures. The recommendations provided are for informational purposes only and do not represent AHCCCS' planned target thresholds.

AHCCCS-01 (CBE 0431 Modified): Influenza Vaccination Coverage Among Healthcare Personnel

Average Based – Year 1/2/3/4	Average Based – Year 4	Percentile Based – Year 4		
		50th Percentile	75th Percentile	90th Percentile
91.29%	92.33%	92.36%	97.66%	98.70%

AHCCCS-02 (CBE 0531 Modified): Patient Safety Indicator (PSI) 90: Patient Safety and Adverse Events Composite

118.85	124.25	104.00	104.00	118.50

Appendix C. Year 4 Narrative Responses

The remainder of this page is intentionally left blank.

General Acute	ST JOSEPH'S HOSPITAL-TUCSON	134003	<p>•We have implemented the following strategies to reduce prevent hospital acquired C. difficile</p> <ul style="list-style-type: none"> oA Nurse Driven Protocol that allows nursing staff to place orders for C. difficile testing on patients at high-risk for C. difficile in the first 3 days of hospitalization. oRegarding the C. diff orders past 3 midnights had to have an ID consult to place the order. oA C. difficile TIMEOUT form that must be completed with each specimen submission that asks questions that will prevent improper testing, including administration of diarrhea-causing medications, documented occurrence of multiple episodes of diarrhea, and stool consistency. oPlacing known and suspected cases of C. difficile infection in enteric precautions oPracticing Standard Precautions oReview antibiotic prescribing practices (Antibiotic stewardship) oEnsuring that sporicidal cleaning agents are used in known and suspected cases of C. difficile. oConsistently performing appropriate hand hygiene, with use of soap and water, rather than alcohol-based hand sanitizer in all interactions with known or suspected C. difficile patients; process monitored by conducting Hand Hygiene Audits. oOngoing education of staff & providers: <ul style="list-style-type: none"> oEarly detection of symptoms – timely testing oStool descriptions oStool collection – using the C. difficile Time Out form oTesting algorithm – what do the results mean and when to test oCorrect isolation precautions (Contact Enteric Precautions) and using the correct signage oUse of bleach for cleaning and wiping equipment oBathing and patient hygiene oUse of “C-diff Tool Kit” (prevention measures) oDocumentation oProper use of PPE oTransmission of C-diff oInfection preventionist daily surveillance
General Acute	ST MARY'S HOSPITAL	134169	<p>•We have implemented the following strategies to reduce prevent hospital acquired C. difficile</p> <ul style="list-style-type: none"> oA Nurse Driven Protocol that allows nursing staff to place orders for C. difficile testing on patients at high-risk for C. difficile in the first 3 days of hospitalization. oRegarding the C. diff orders past 3 midnights had to have an ID consult to place the order. oA C. difficile TIMEOUT form that must be completed with each specimen submission that asks questions that will prevent improper testing, including administration of diarrhea-causing medications, documented occurrence of multiple episodes of diarrhea, and stool consistency. oPlacing known and suspected cases of C. difficile infection in enteric precautions oPracticing Standard Precautions oReview antibiotic prescribing practices (Antibiotic stewardship) oEnsuring that sporicidal cleaning agents are used in known and suspected cases of C. difficile. oConsistently performing appropriate hand hygiene, with use of soap and water, rather than alcohol-based hand sanitizer in all interactions with known or suspected C. difficile patients; process monitored by conducting Hand Hygiene Audits. oOngoing education of staff & providers: <ul style="list-style-type: none"> oEarly detection of symptoms – timely testing oStool descriptions oStool collection – using the C. difficile Time Out form oTesting algorithm – what do the results mean and when to test oCorrect isolation precautions (Contact Enteric Precautions) and using the correct signage oUse of bleach for cleaning and wiping equipment oBathing and patient hygiene oUse of “C-diff Tool Kit” (prevention measures) oDocumentation oProper use of PPE oTransmission of C-diff oInfection preventionist daily surveillance
General Acute	FLAGSTAFF MEDICAL CENTER	020123	<p>As part of the ongoing effort at FMC to improve measure performance and provide a safe environment of care for our patients, we implemented 2-Step Testing for C DIFF in November 2021, improving identification of colonized patients. In addition to sustaining the improvements seen with the 2-Step testing implementation, we have worked on other interventions such as: updated nursing workflow to check for signs and symptoms, mandatory documentation of stool consistency, improved Clinical Decision Support at point of ordering, proactive identification of at-risk patients and eliminating verbal orders. Throughout the process, we have also offered Infection Prevention consultation as a resource to providers and nursing, continued education, and provided performance feedback on a regular basis. Current initiatives include a focus on handwashing, consistent cleaning practices for all rooms on enteric precautions, increased use of UV sterilization and continued surveillance of cases.</p>
General Acute	VERDE VALLEY MEDICAL CTR	020438	<p>As part of the ongoing effort at VVMC to improve measure performance and provide a safe environment of care for our patients, we implemented 2-Step Testing for C DIFF in November 2021, improving identification of colonized patients. In addition to sustaining the improvements seen with the 2-Step testing implementation, we have worked on other interventions such as: updated nursing workflow to check for signs and symptoms, mandatory documentation of stool consistency, improved Clinical Decision Support at point of ordering, proactive identification of at-risk patients and eliminating verbal orders. Throughout the process, we have also offered Infection Prevention consultation as a resource to providers and nursing, continued education, and provided performance feedback on a regular basis. Current initiatives include a focus on handwashing, consistent cleaning practices for all rooms on enteric precautions, increased use of UV sterilization and continued surveillance of cases.</p>
General Acute	YAVAPAI REG MED CENTER	020420	<p>Implementation of two step testing method, ticket-to-test, staff education and individual case reviews with Infection Prevention/Antibiotic Stewardship Cdiff subcommittee.</p>
General Acute	MAYO CLINIC HOSPITAL	449357	<p>1. - Review every case and meet with providers to identify opportunities for improvement. - Promote and educate to a Cdiff testing algorithm to appropriately identify infections. - Electronic medical record alerts to remind nursing staff of testing need when applicable. - UV disinfection and bleach cleaning processes for all Cdiff rooms to prevent transmission. - Medical record order hard stop when there are less than 3 type 6-7 stools in 24 hours. 2. - Cdiff is often community spread so patients present to the hospital with Cdiff unknowingly. - Antibiotics given appropriately oftentimes cause opportunistic growth of Cdiff in colonized patients.</p>
General Acute	CANYON VISTA MEDICAL CENTER	831868	<p>Implementation of daily patient safety rounds and 2 nurse verification of appropriate indications for C.diff testing. Implemented influenza vaccine clinic through employee health as well as a station during mandatory annual skills fair.</p>
General Acute	HAVASU REG MED CENTER LLC	167982	<p>1. Implemented a 2-nurse verification for CDI testing. Made admission screening for high-risk patients to test upon admission. Created lab hard stop and IP review before testing is completed for appropriateness. Ensured to method testing methodology is utilized for all testing. Completed Gap Analysis on CDI practices including, testing, treating and infection control practices. 2. Growing levels of community CDI, population has high average age and antibiotic use.</p>
General Acute	VALLEY VIEW MEDICAL CTR	104567	<p>1. Implemented a 2-nurse verification for CDI testing. Made admission screening for high-risk patients to test upon admission. Created lab hard stop and IP review before testing is completed for appropriateness. Ensured to method testing methodology is utilized for all testing. Completed Gap Analysis on CDI practices including, testing, treating and infection control practices. 2. Growing levels of community CDI, population has high average age and antibiotic use.</p>
General Acute	TUCSON MEDICAL CENTER	020462	<p>C diff infection reduction occurred through early identification of symptoms and lab test stewardship which has been sustained thru electronic health record order support and availability of Infectious Disease consults. Additionally, each hospital-onset C diff case is critically analyzed for missed opportunities to be addressed.</p>
General Acute	ORO VALLEY HOSPITAL	921107	<p>The facility has implemented all essential practices for decreasing hospital onset C difficile infections from the most up to date 2022 IDSA guidelines. Including the inclusion of a criteria decision algorithm to aid in diagnostic stewardship to ensure only those who clinically are at risk for a CDI infection are being tested. In addition, the facility implements extended duration of contact precautions for any CDI positive patient for the length of their stay. This includes hand hygiene with soap and water after any entry into the patient room, and wearing gown and gloves for any patient encounter. Also, enhanced cleaning with a sporicidal disinfectant or UVC light at patient discharge prior to a new admission to that same room is completed by the housekeeping team. Process measures are reported quarterly through Infection Control Committee meetings, and through the hospital Quality Improvement Council.</p>
General Acute	NORTHWEST MEDICAL CENTER	481309	<p>The facility has implemented all essential practices for decreasing hospital onset C difficile infections from the most up to date 2022 IDSA guidelines. Including the inclusion of a criteria decision algorithm to aid in diagnostic stewardship to ensure only those who clinically are at risk for a CDI infection are being tested. In addition, the facility implements extended duration of contact precautions for any CDI positive patient for the length of their stay. This includes hand hygiene with soap and water after any entry into the patient room, and wearing gown and gloves for any patient encounter. Also, enhanced cleaning with a sporicidal disinfectant or UVC light at patient discharge prior to a new admission to that same room is completed by the housekeeping team. Process measures are reported quarterly through Infection Control Committee meetings, and through the hospital Quality Improvement Council.</p>
General Acute	NORTHWEST SAHUARITA	088182	<p>The facility has implemented all essential practices for decreasing hospital onset C difficile infections from the most up to date 2022 IDSA guidelines. Including the inclusion of a criteria decision algorithm to aid in diagnostic stewardship to ensure only those who clinically are at risk for a CDI infection are being tested. General Acute	SUMMIT HEALTHCARE REG MED	020016	<p>Hospital-associated (HA) C. diff rates at Summit Medical Center were in a decline but have started to rise again. No common room trend can be found among hospital-associated cases. While we don't often see patients on Senior Behavioral Health requiring isolation this trend has been increasing, mostly due to active C. diff infections. Summit Medical Center's community-associated cases continue to be high. From January to June, Summit has had an average of eight patients hospitalized per month with community-associated C. diff. Due to the high community-acquired rate, Summit is at risk for increased hospital-acquired infections. Please see Summit's current strategies, areas of improvement and action plan below: Current strategies utilized: •C. diff prevention bundle •Placing patients with C. diff in a room near a hallway sink for ease of hand washing by clinical staff •Culture of accountability among floor staff for hand hygiene and PPE adherence in isolation rooms •72-hour antibiotic review by pharmacy with communication to the providers Areas for improvement include: •Increase hand hygiene compliance among floor staff and providers oOverall compliance of hand hygiene is consistently in the 90th percentile, but there is always room for improvement •Increase PPE compliance among providers oHand hygiene audit results reveal that physicians consistently skip hand hygiene upon entry and exit of patient rooms and do not wear PPE in isolation rooms •Early detection oTwo of the HA cases have a correlation to delayed testing. Diarrhea was charted but testing was not done within 24 hours of first loose stools Action Plan: - Discuss monthly hand hygiene results with floor staff - Implement monthly PPE audits - Provide education to staff regarding high-risk patient population and high-risk antibiotics - Increase nursing awareness of antibiotic stewardship through education. - Flyers will be shared during each unit's safety huddle and posted on the units - Pharmacy to share 72-hour antibiotic review with each patient's primary nurse as well as the communication process that occurs between pharmacy and providers - Senior Behavioral Health is planning to revamp PPE storage as this creates risk for the patient population - SBH to do more rigorous testing of patients that come from long-term care facilities and more quickly evaluate appropriate placement with SBH - SBH to perform timely GI nursing assessment - Increase antibiotic awareness among Emergency Room and Urgent Care patients through educational materials at discharge - Timely chart audits of each HA case by Lead NCL and primary nursing staff to help identify opportunities for improvement - Infection preventionist C. diff drill down shared with unit leadership as new information added - Share hand hygiene and PPE audit results with providers - Community outreach including education posters/signage on community boards, pharmacies, community shopping areas - Summit Outpatient Pharmacy will distribute C. diff educational flyer with all antibiotic prescriptions dispensed - Reach out to the community retail pharmacies in the area and inquire about antibiotic awareness education disseminated. Will share the information regarding large amounts of community associated cases seen at Summit to raise awareness among the community pharmacies</p>

AHCCCS-07 (CBE 1789 Modified): 30-Day Hospital-Wide All-Cause Unplanned Readmission Rate			
Category Name	Hospital	AHCCCS ID	Narrative Response
Short Stay Hospitals	AZ ORTHOPEDIC SURGICAL HOSP	882747	<p>1. Interventions and activities implemented or planned to improve measure performance and member health outcomes. a. We look at the appropriateness of the patient having surgery at our specialty hospital upon scheduling (comorbidities, BMI, etc.). b. Track/Trend and Peer review for adverse outcomes (Readmissions, ER visit within 7 days, SSI's, etc.). c. Patient Education prior to surgery, during stay, at discharge and during our post-discharge calls. We offer an in-person and online Patient Class that includes a patient education book in order to provide useful information and multiple opportunities for patient/family questions. Surgeons are highly encouraged to send their patients to our website to sign up for a class. We also use the feedback from these classes to improve the information that is provided. d. Our contracted hospitalists have a Transitional Care Management Team that will provide follow-up with an NP for 30-days at the request of the patient. e. Case Managers meet with patients and their support system to develop a safe/appropriate discharge plan and arrange any post-acute services required (HHC, SNF, etc.). f. A summary of the patient visit(s) is sent to the PCP following discharge from our hospital, for continuity of care. These are just some of the things that we do to provide excellent care to our patients. We are constantly working towards being the best at what we do and providing our patients with the best care possible along with a great experience. 2. Any external factors impacting efforts to improve measure performance, if applicable. Descriptions may be provided at the hospital system level. External factors that impact our efforts to improve measures and patient outcomes are: Not all patients follow the recommendations/directions given to them for a successful recovery once they go home. We work hard to provide the tools and education needed for the best outcome and stress that we are always available for questions or concerns, but not all patients take advantage of this. We will continue to work on improving and coming up with new ways to educate patients and their caregivers.</p>
Short Stay Hospitals	THE SURGICAL HOSP OF PHX	948325	Due to our patient population and elective surgical procedure types, we do not have readmissions. We have no emergency department, so any post-operative care would be performed in a different facility.
Short Stay Hospitals	EXCEPTIONAL HEALTH CARE YUMA	160576	Vaccinations are made available to 100% of assigned personnel on staff once the vaccines are obtained every fall.
Short Stay Hospitals	MARICOPA COMMUNITY HOSPITAL	154932	Vaccinations are made available to 100% of assigned staff once vaccines are obtained every fall.
